BondbloX

The Problem

Overview

FAQs

Hi, how can we help?

Background

- Large, global clientbase
= Diverse questions
24/7
- Currently: Human to
Human approach

Limitations/problems

- Delays
- Inefficiency
- Added workload
- Room for human error

Solution

- Tackle challenges
without compromising
quality
- AI-powered chatbot

When answers lag, decisions drag:

The fundamentals of the problem

“Bond investing made easy”

But unanswered queries = barriers to even easier investing

Fast pace of Bond market

The bond market moves fast - and we need to move faster.

With clients across multiple time zones, timely support is critical.

Platform Growth but stalled headcount

As user base grows, the support load scales **linearly** with it - but headcount can't.

Leads to burnout, hiring pressure, or increased error rates.

Reactive, not proactive

Current system waits for client confusion to surface. A smarter system could proactively answer, predict questions, or trigger onboarding nudges

**Unanswered questions
take 1-1.5 days to be
solved**

**Follow up questions are
answered immediately or
within 2 minutes**

**There are 10-11 client
queries on average per
month & roughly 4 follow
ups on answered queries
per day**

BondbloX

How Our Chatbot Solves This

1. Real-time and immediate responses
2. Automated monthly queries and daily follow-ups, cutting response time + easing manual workload

Additionally, the common client complaint categories seen in the slides above are answered efficiently through our chatbot

Example:

Why do we need a chatbot if we already have a dedicated FAQ page?

Question asking “How and where is my money stored before and after purchasing bonds on BBX?”

Where and how are my assets (ie. cash and underlying bonds) kept? ^

All cash and underlying bonds deposited with BondbloX Pte. Ltd. are separately custodised with independent third party global bankers and custodians - Northern Trust and Citibank.

The deposited cash and underlying bonds are held by BondbloX Pte. Ltd. as bare trustee for the relevant Holders (defined in the Deed Polls) pursuant to the Deed Polls. Each Series of Deposited Bonds shall be subject to a separate trust and events affecting one Series shall not affect any other. BondbloX Pte. Ltd. shall not be beneficially entitled to such deposited cash or underlying bonds.

For further details, please refer to the relevant Deed Polls as well as Rule 14.12 of the Rulebook.

Financial jargon

No direct link to the Rulebook.
Client left to research on their own.

How will the chatbot tackle these challenges?

14.1.2. BondValue shall open and maintain bank account(s) with one or more Bankers, under which accounts shall operate to segregate Cash from BondValue's monies and BondValue shall not commingle its monies with the Cash of any Member Participant.

8.6. Currently, the Bankers and Designated Custodians who have been appointed are The Northern Trust Company and Citibank, N.A. Singapore Branch.

Use of more plain language to convey the same information. Breakdown of information of the rule book for easier digestion.

- **Third-Party Custodians:** All cash and underlying bonds deposited with BondbloX Pte. Ltd. are held by independent third-party global bankers and custodians, specifically **Northern Trust** and **Citibank**.

- **Bare Trustee:** BondbloX Pte. Ltd. acts as a bare trustee for the relevant holders, meaning they do not have beneficial ownership of the deposited cash or bonds. This ensures that your assets are kept separate from BondbloX's own funds.

Segregation of Assets

- **Segregated Accounts:** Your funds are segregated from assets. There is no co-mingling, which adds an extra layer of security for your investments.

Record Keeping

- **Debentures Ledger:** Ownership is tracked through a Debentures ledger. This ledger serves as the record of legal and beneficial ownership of the BondbloX you hold.

11.5. Title to the BondbloX passes by registration in the Debentures Register in accordance with the Rulebook. Entries in the Debentures Register in relation to a BondbloX constitute conclusive evidence that the person so entered is the registered owner of the BondbloX. The entity registered in the Debentures Register as the Holder of any BondbloX registered in the Debentures Register as such will (except as otherwise required by law) be treated as its absolute owner for all purposes.

the relevant Deed Polls and the BondbloX

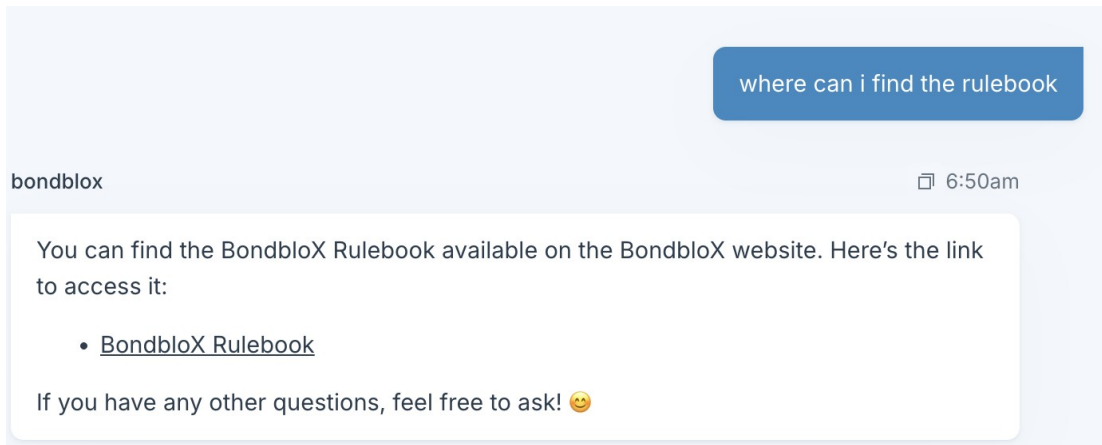

For further assistance, feel free to ask! 😊

Real time back and forth. New queries answered immediately.

How will the chatbot tackle these challenges?

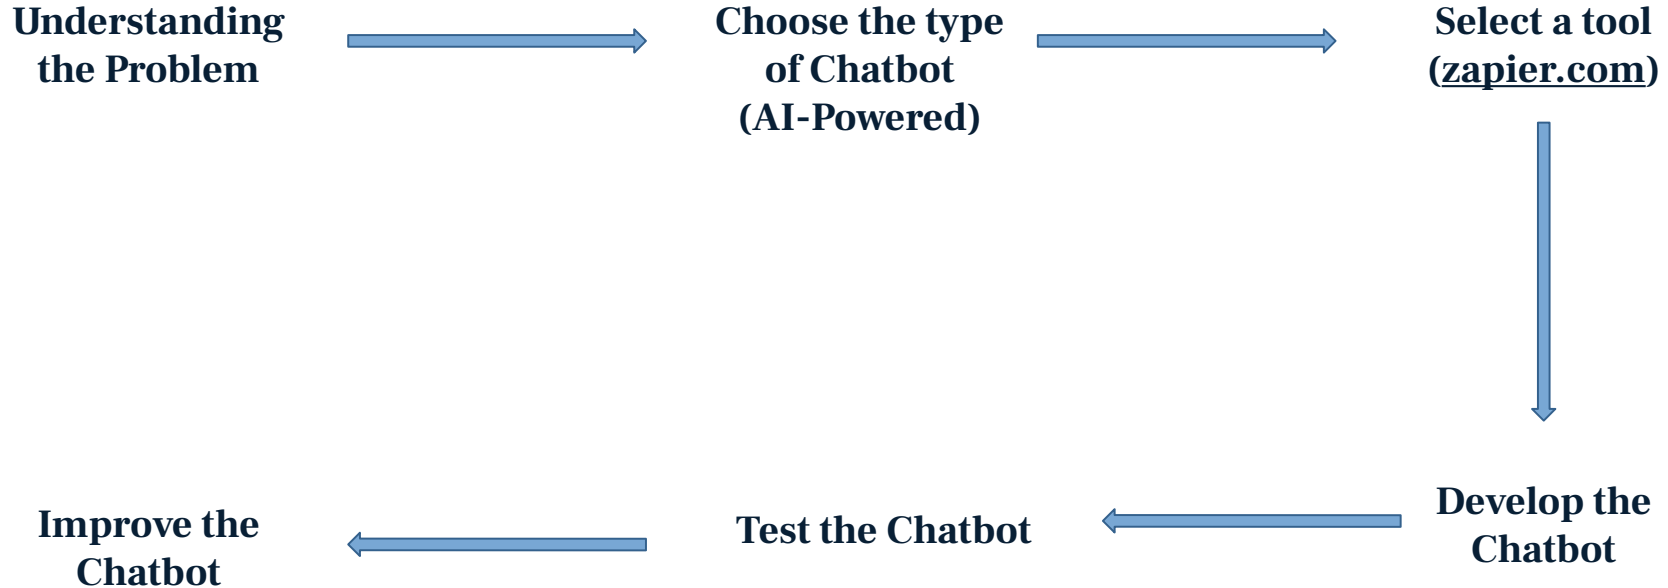

Able to answer new questions real time.

Client does not have to worry about the 'significance' of the question.

Methods

1. *Why not Gen AI?*
 - Maintain accuracy, control, and compliance
1. *How and What did we input into our bot?*
 - The bondbloX website
 - Rule book
 - Manually created document with general information on bonds
1. *Why these sources?*
 - They are official documents with up-to-date, relevant information that is likely what the clients are looking to learn / ask about
1. *Challenges*
 - The chatbot couldn't parse through all of the website's pages completely
 - Some of the information was getting ignored by the chatbot
 - Too many pages in the website for the chatbot to process
1. *Overcoming challenges*
 - We troubleshooted and realized that every single new page in the website must be treated as a separate source, so we had to select a few for this demo

Features of the Chatbot

- Natural Language Processing (NLP)
 - Converting Unstructured language (human language) into Structured language (language understood by AI)
- Context awareness
- Machine Learning Ability
 - Using Yes/No feedback features like “Was this answer helpful” to continuously improve responses
- 24/7 Availability
- Multilingual support

Looking ahead: Operationalising the Chatbot

More than just a FAQ-bot

- Inputting all data on BBX website - beyond just the FAQ page
- Able to answer real-time questions about specific bonds
 - Coupon
 - Yield
 - Maturity
 - Risk level
- Potential to gather data for improving client experience
 - Using Chatbot to see the big picture (eg What are some of the most frequently asked questions? What can we improve such that these questions don't need to be asked?)

Room For Improvements

- Need for manual coding to be BBX specific + real time tracker.
- These examples show that without the manual coding and integrated BBX data, the chatbot isn't able to provide bond-specific answers

what is the most popular bond on bondblox

bondblox

📅 7:35am

I couldn't find specific information about the most popular bond on BondbloX. However, BondbloX offers a wide range of bonds, including corporate, sovereign, and bank bonds, which investors can trade.

If you're looking for popular or highly-rated bonds, you can explore the [BondbloX platform](#) for current listings and market trends. If you have any more questions or need further assistance, feel free to ask! 😊

what is the current yield on US404280DX45

bondblox

📅 7:04am

Sorry! I can't help with that. For more information, contact [BondbloX Support](#).

**Thank
You!**
